Homeowner Instructions

Pre-Construction Instructions:

1. Possible vibrations may cause damage to wall hangings and fragile items on shelves. Please remove them from the walls and store them safely during the construction.
2. Vibrations may also set off your burglar alarm system, so please disarm it during construction.
3. For pet safety, please confine your pets indoors, or away from the house.
4. Please cover your swimming pool.
5. Because of falling debris, please move potted plants indoors or away from the house.
6. Please park your vehicles away from the house.
7. If we are installing decking, please cover or remove any objects stored in the attic or in the garage if the garage has no ceiling.

During Construction Instructions:

1. Our roofing crew will need access to a source of electricity and water.
2. Construction debris such as nails, shingles, and wood will be around your home and in your driveway. Please exercise extreme caution when walking around your home.
3. Overhead construction always poses the danger of falling objects. Please be aware of this hazard when entering and exiting your home.

Post-Construction Instructions:

1. Make sure all gates are closed before letting pets outside.
2. We make every effort to remove all nails from construction area, however, we may miss some, so please be careful and watch for overlooked nails.
3. If it is necessary for Roofing Giant to obtain and display a construction permit, please do not remove it until the City has completed its inspection.
4. Check furnace and hot water vents to ensure that they are connected. (They may come loose during construction.)

It is a pleasure to work with you!
